

WETA-FM has licenses for several translators in the region of the Potomac River valley, granted primarily so a larger public could access its unique programming of concert music, cultural programs and recorded music. If WETA-FM changes its format as indicated in the news to one of all-talk, all-news, it would no longer be providing a unique programming service, but replicating an already abundant programming format, ubiquitous in the AM, FM and cable channels. Therefore, I petition to have WETA-FM's repeater and translator licenses revoked should WETA-FM no longer provide the service under which is successfully petitioned to acquire these repeater and translator licenses.
